SKILLS

- Frontend: HTML, CSS
- Backend: Django, Python, PHP
- Tools: GitHub

CERTIFICATIONS

- Machine Learning — New Horizon, 2025
- Python Development — New Horizon, 2025
- Node.js — New Horizon, 2025
- HTML, CSS & JavaScript — New Horizon, 2025

PROFILE

I am a Web Application Developer, skilled in Django and Python for back-end development and AI integration. I specialize in integrating APIs and AI models into websites to optimize performance and perform specific tasks. I have a proven track record of boosting website efficiency, ensuring proper automation, and delivering responsive designs.

WORK EXPERIENCE

GLOBALTECH COMPUTER INSTITUTE — Web Application Developer (Intern)

Feb 2024 — Jul 2024

- Created multiple websites using Django.
- Conducted code reviews to enforce best practices and maintain useful standards.
- Researched emerging web application technologies to improve project quality.
- Developed user interfaces focused on usability and responsive design.
- Taught front-end development and participated in stakeholder meetings to identify and solve problems.
- Applied customer-satisfaction practices that improved client outcomes.

ADELEKE UNIVERSITY — Back-End Developer (Tradeway Project)

Jan 2025 — May 2025

- Worked on Tradeway, an e-commerce platform developed as part of an academic course.
- Served as a Django back-end programmer and assisted with documentation for the back-end team.
- Collaborated with project stakeholders using Agile methodology and regular meetings.

EDUCATION

B.Sc. Computer Science — Adeleke University (2021–2025) —
Second-Class Upper (4.28 GPA)

MAJOR PROJECTS

- **AU Class Portal** — Virtual learning environment with AI-assisted assignment grading and real-time communication tools.
- **Tradeway** — E-commerce platform built with Django following Agile practices.
